

Heritage College Two story Specialist Classroom block.

Duration: 8 months.

Completion Date: January 2006.

Consultants: Genem Architects

Project Brief. Two Storey Specialist Classroom block.

New Construction of a two storey education building consisting of two GPLA's and two specialist classroom facilities. One side of the ground floor consisted of a Home economics class room with adjoining dinning room, bi fold doors opening out onto an alfresco dinning courtyard.

The second side of the ground floor consisted of a science classroom, science laboratory, teacher spaces and lockable store area.

Located on the first floor are two GPLA's which where accessible by newly created stair case and a enclosed verandah / hall running the length of the building. The new construction was to adjoin an existing two story classroom block and the first floor enclosed hall way was opened up to connect to the existing classrooms.
